

Rio Metro Regional Transit District

New Mexico Rail Runner Express

Commuter Rail Operations & Maintenance

REQUEST FOR PROPOSALS

RMRTD Procurement No. 2021-03
Issued: March 29, 2021

Addendum #7
RFP #2021-03

Addenda #7 is issued to: respond to vendor questions

Rio Metro Regional Transit District

New Mexico Rail Runner Express Commuter Rail Operations and Maintenance RFP 2021-03

RFI LOG and Request for Information /Clarification or RFP Language Change Form

Number	Identify RFP Specific Part; Page and Section	Question or Request for Clarification to RMRTD	ANSWERS
1		Will RMRTD provide a 8-year history of the pass-through costs associated with this Service? Offeror needs to evaluate the impact of these relatively low margin responsibilities.	RMRTD budget for pass through items are contained in its annual budget and capital plan which includes a 7-year projection by line item. The plan is available at the following link: https://www.riometro.org/DocumentCenter/View/1215/Rio-Metro-Capital-Plan-Final-May-2020-PDF?bidId=
2	RFP Section 5.1	Please provide more detail on the "If Necessary" Oral Interview and Best & Final Offer Scoring. The first 100 points have a somewhat objective scoring criteria but the 50 points available for Interview and BAFO seem very much subjective. Are they pass-fail in nature or is there a scoring criteria that has not been provided?	If necessary, RMRTD will include information/instructions to final offerors invited to participate in oral interviews and BAFO
3	Draft Contract, Section 9	Please provide an insurance program structure (carriers, limits, retentions).	See draft contract
4	Draft Contract, Section 9	How much of the insurance is self-insured?	See below
5	Draft Contract, Section 9	Is it a 5M SIR?	For the NMDOT/RMRTD provided policy it is 5M
6	Draft Contract, Section 9	Do all policies up the tower follow the same terms and conditions?	For the NMDOT/RMRTD provided policy, Yes
7	Draft Contract, Section 9	Is our general liability policy intended to be "primary" over the 323M policy?	GL Insurance when required under 9(a)(3) or 9(a)(4) is primary.
8	Draft Contract, Section 9	Is the contractor required to provide Railroad Protective Liability Insurance?	See draft contract Section 9
9	Draft Contract, Section 9	Will you accept a 3M/6M railroad liability policy vs. 5M/10M?	When required Under 9(a)(3) must be 5M/10M, When/If required Under 9(a)(4) can be 3M/6M or what RMRTD determines is necessary.
10	Draft Contract, Section 9	Does RMRTD have any knowledge of any environmental events on the Service property?	There have been no events on the Service Property that we are aware of since NMRX service began
11	Draft Contract, Section 9	Does RMRTD have any environmental assessment reports?	No, but we believe NMDOT completed due diligence and an initial site assessment as part of the purchase from BNSF and competed an EA as part of the new / reconstruction for the SF Subdivision
12	Draft Contract, Section 9	Can RMRTD provide a "No Known Loss" letter confirming no previous knowledge of any environmental events?	Language may be negotiated into the final contract with the successful offeror
13	Draft Contract, Section 9	Can RMRTD provide a detailed schedule of all RMRTD-owned tanks at Commuter stations and 100 Iron Avenue facility that are being made available to the contractor to use in the performance of the Service? The information needs to include capacity, age of tank, material, leak detection, single/double wall information, and material stored within.	There is a sewage waste tank at 100 Iron used to service the fleets bathrooms. There are no fuel tanks or other tanks on the property. NMRX locomotives are fueled by fuel trucks.
14	Exhibit E, RMRTD Inventory	Please confirm that the inventory shown that hasn't been depleted remains the property of RMRTD and can be used by the Contractor in the performance of the Service.	Yes
15	Exhibit E, Inventory Snapshot	Please confirm that the inventory shown that hasn't been depleted remains the property of RMRTD and can be used by the Contractor in the performance of the Service.	Yes
16	Exhibit E, NMRX Spare Parts	Please confirm that the inventory shown that hasn't been depleted remains the property of RMRTD and can be used by the Contractor in the performance of the Service.	Yes
17	Exhibit E, Rolling Stock Info and Materials Inventory	Can RMRTD provide updated inventory information prior to the bid due date in order to determine appropriate unreimbursed costs?	See Attached
18	Exhibit E, RMRTD Inventory	Will the Track Spike inventory be replenished by the contractor at the conclusion of the Year 8 Tie Gang?	Yes
19	Exhibit E, Rolling Stock Info and Materials Inventory	Is there a comparable spare parts inventory for signal and communications maintenance (switch machines, gate mechanisms, etc. that are valued in excess of \$5000 or any other parts that the existing contractor has procured in performance of the contract that will remain the property of RMRTD)?	See attached
20	Appendix 6.10	The Inventory Catalog provided in Exhibit E has many item quantities at 0 and many others at a very low quantity of 1 or 2. Since the Contractor is required to maintain the inventory with necessary items during the life of the contract: Will the inventory be restored prior to the start of the new contract at the level "necessary" to maintain the fleet without material supply issues?	The Inventory Catalog includes all items recommended by the original consultant that designed the service. Over the years, the inventory has been reduced, changed, items deleted and items added based on the spare parts necessary to maintain the fleet without material supply issues. RMRTD believes the inventory is adequate, but fleet without material supply issues. RMRTD believes the inventory is adequate, but will work with the successful offeror to ensure inventory is at the necessary levels to maintain the fleet without supply chain issues prior to the turnover date.
